We, as an Export Management Company (EMC) are a company that acts as an outside export department for small and mid-sized manufacturers.

By representing several similar, but non-competing, regional products, we are able to leverage our expertise to systematically develop overseas distribution channels for several manufacturers.

The core value EMCs provide is to develop international business opportunities and allow partner companies to focus on manufacturing and the local market. EMCs can be a great way to expand while facing staffing shortages or a lack of in-house exporting knowledge.

We are here to perform our trade business with honesty, loyalty and mutual respect. We move products where is plentiful to where is most needed.
